—BY—
ARCHIE P. McKISHNIE

Printed by Special Arrangements with Thea. Allen, Toronto, Ont.

(Continued.)

He walked over to the spring repeating the words over and over—"no more—Boy and girl no more!" From Toberide came the clang of the school bell.

"I wonder what she meant. I wonder why she wished that school—no more—Boy and girl no more!" Suddenly he flung the squirrels from him, and bidding forward gasped with hard eyes toward the white schoolhouse clinging to the hill.

"If he thinks harm to her, then God curse him," he breathed, "and help me to kill him."

A wee hedge-sparrow, drunk with the hazy Indian summer sunshine, perched itself on a branch above his head and poured out the simple little song that he had always loved above all other songs of wood-birds, because it was always the first song in new spring; the last in dreary fall.

The little singer was about to leave the wood wherein he had nested and enjoyed a season's happiness. He was about to fly far south, and was trilling a promise to Boy to come back again another springtime. And Boy listened to the simple song and wondered at the gladness of it. Nothing of the deep unrest of his own soul was there—only the gladness of a heart brimful of God's deep joy. Boy sat down on a log and watched the bird.

"Little chap," he murmured, "you have got a long way to go. I guess I know about as well as anybody could know you, unless it's Daft Davie, who's wild like yourself, and I can't understand why you should be glad when you're leavin' him this."

He looked about him. "All this nestin'-place. The great big woods here might as well be a desert. It's mighty good. There's a little you built here, and you've got to leave it behind."

A shadow floated across the hazy sunlight and a cold wind swept from the bay. With a last sweet note of good-bye the bird sprang to wing, and beating skyward high above the trees faded, a little darting speck in the sombre clouds rolling up in the south. Boy watched it until it's tiny gray body was lost against the sky's gray fringe. Then he sighed, picked up the squirrel and proceeded to strip them, deftly, of their glossy coats. This done, he washed them carefully and carried them to the house. Gloss was standing by the table in the kitchen and spoke to him as he entered.

He answered her almost rudely and strode outside. The sky had darkened, and a low wind was shaking the dead leaves from the trees. Boy plunged down the path and into the wood. A shaggy dog, snoring beside the ash-trunk, started up and snarled furiously from half-closed eyes. When Boy's figure disappeared behind the slope, the dog rose, shook himself, and with stiffened muscles trailed his master stealthily.

Deep into the woods, Boy paused before a small grove of baby maples. Beneath their spreading branches stood a playhouse built of rough bark and twigs. He and Gloss had built this house; she, girl-like, to play at mimic life therein; he, boy-like, that she might own her little wood. There stood the table, a basswood block set for a feast, with broken bits of crockery and glass for dishes. It seemed but yesterday that he and Gloss had sat before that table and eaten an imaginary repast of earth's luxuries from those broken dishes. It all seemed so poor, so lonely, and deserted now.

In the twig high-chair slept Peggy, the rag doll, her arms dangling, her whole attitude one of peaceful repose. Boy crept in shamefacedly and swept the cobwebs from her poor little face. Then he sat down on the stump-chair, and, laying his arms on the table, rested his head upon them. In the open the clouds scudded low above the trees, and it began to snow. Boy arose and walked about the little house, his eyes searching it for the small trinkets the girl had treasured there. A bunch of dead flowers rustled in the cracked cup on the bark shelf. They were tied with a gorgeous bit of red flannel, which, he remembered, Gloss had been careful to explain was watered silk. Boy smiled, and pressed the knot between his fingers.

On the floor lay a home-woven straw hat. Its decorations, too, were of woodland flowers faded to ash and scentless. Boy caught it up and held it at arm's length, then he threw it from him and sprang out into the darkening wood again.

He hurried on, passing the tree-

swing where he and the girl had played so many summers. He passed through the hickory grove where they had gathered the nuts for the winter's cracking; through this and to the heavier timber and deeper shadow where the light was very dim, and forest whippers stirred one another. A fox glided across his path, switching into a clump of hazel-bushes. A cock grouse, drumming upon a decayed log, arose on thundering wing to dip into a clump of trees for to the left. Farther into the wood the cluck of a wild turkey sounded. Boy heeded none of these things. On and on he strode—his an aimless, goad his one desire, to come up with that something feared and elusive—something he feared though treasured and could not understand.

Later, he stood in the low-lying wilderness of Elm Swamp. And there, perhaps, his great Mother plying solved for him the problem of a new unrest. There where day's lights wavered faintly like foggy starlight, his soul shook off its brooding, and the old glad fearless light came back to his eyes.

"No, we ain't girl and boy no more," he whispered; and lifting his arms high he laughed.

What he had received from the forest soothed his spirit as the starry snowflakes, falling on his upturned face, soothed his burning flesh.

At mid-day the better crept back to his old place by the ash-trunk and lay down. A little later Boy came up the path. He stooped down and patted the dog's head, and noting his tangled hair laughed softly.

"Joe, old pup, I thought it was me who had to roam among the briars and burrs; but I see you've been there, too."

And Joe looked up and yawned sleepily, just as if he had been awakened from his forenoon's nap. Boy ate his dinner in silence. When he arose he glanced at Gloss. She was standing before the window, and Boy saw her perfect face, crowned by a mass of heavy chestnut hair, clear-lined against the light of an outer world. Her great eyes were looking into space; she was dreaming.

"The young man ought to be married," the young man thought. The whistle of Hallibur's mill sounded its challenge, and, squaring his broad shoulders, he laughed. Something new had come to him. Not strength; though strength was of it. Not defiance; though it help him to defy. Boy did not attempt to define that new thing; it was enough for him to know that he possessed it.

(To be Continued.)

Faint and Dizzy Spells, Weakness and Shortness of Breath.

"You can generally tell when the heart is affected by the faint and dizzy spells, the shortness of breath, palpitation, throbbing, irregular beating, smothering sensations, weak, sinking, all-gone feeling, choking, sensation, etc."

Many men and women become run down and worn out when otherwise they could be strong and healthy if they would only pay some attention to the first sign of heart weakness.

No remedy will do so much to restore the heart's strength and vigor, regulate its beat and restore it to a healthy and normal condition as Milburn's Heart and Nerve Pills. Mrs. C. A. S. Drake, Paris, Ont., writes: "I have used on towards the second box of Milburn's Heart and Nerve Pills and they have done me good. I had those fainting, dizzy spells, once in a while, and also weakness and shortness of breath, and would become so choked up at times I would have to stop and try to catch my breath. I feel a lot better since I have started on them. I have had some knowledge of some of the primary and essential features of our north country and then any endeavor to open up the territory may be intelligently directed."

The party will be accompanied on the trip north by Constable Maxwell of the provincial police, who is returning to his post at Lac La Ronge after a holiday trip to his home in the east.

At a meeting of the Saskatchewan Associated Boards of Trade, in Regina, a resolution was passed authorizing the association to secure an expert to look after Saskatchewan's interests in all cases, including the application for increased freight rates that may come before the Board of railway commissioners. The completion of the Hudson Bay railway and the changing of the names of various grades of wheat known as "Manitoba grades" to "Canadian western grades" were also asked.

Tells All About a Safe Medicine That Relieves After One Dose

That throbbing pain at the base of the spine is caused by improper kidney action. Fix up the kidneys and the backache goes in a hurry. The most wonderful kidney medicine ever made is Dr. Hamilton's Pills. They contain the juices of certain herbs which soothe and heal all kidney ills. It's a pleasure to take Dr. Hamilton's Pills. They relieve after the first dose, give you a new feeling entirely, remove that dull, throbbing backache, correct urinary disorders, stop headaches, and vague pains through the muscles and joints. They are sold in every drug store. Dr. Hamilton's Pills, which are prepared in the laboratories of the famous Canadian company, and can be depended upon as a safe, swift, and certain cure for Backache, Kidney, Liver, Stomach, or Bladder Troubles. Sold everywhere in 25c boxes.

Explore Northern Saskatchewan

Bureau of Labor Will Investigate the Natural Resources of The North

An exploration party for the northern part of the province is the first step being taken by the Saskatchewan Bureau of labor and industries to develop the development of the natural resources in the land of minerals and waterways. Coal and petroleum or two other principal mineral deposits will be the principal objects of the trip.

The party, consisting of E. Pierce, mines inspector; A. C. Garner, chief land surveyor, and B. L. Thorne, geologist, together with necessary guides and campmen will be expected, travel to Lac La Ronge by way of Montreal Lake and Montreal River and then south into Wapawake Lake and possibly the Moose Lake country.

In making this announcement, Hon. Chas. Dunning, minister in charge of the bureau, stated that the party was being sent to secure certain definite information concerning the country, its timber and mineral resources. "The trip or route is not by any means a new one," said Mr. Dunning, "it has been traversed by prospectors, trappers, geologists, and mining men a great many times during the last few years, with the result that a great deal of information is now available concerning the country and its resources. But it would seem that Chas. Dunning, minister in charge of the bureau, stated that the party was being sent to secure certain definite information concerning the country, its timber and mineral resources. "The trip or route is not by any means a new one," said Mr. Dunning, "it has been traversed by prospectors, trappers, geologists, and mining men a great many times during the last few years, with the result that a great deal of information is now available concerning the country and its resources. Foreign Railway and Rates

During December, 1919, and January, 1920, the Italian railways advanced their first-class passenger fares 60 per cent, their second-class fares 40 per cent, and third-class fares 30 per cent. Both freight and passenger rates already during the war had been advanced 20 to 40 per cent.

The passenger rates of the French railways, two of which are owned by the government and all of which are being operated under government control, were advanced 30 per cent during the war and the freight rates 50 to 75 per cent. Because of the deficits which have continued to be incurred proposals for further advances have been under consideration.

The advances in rates on the Austrian railways since pre-war days have been enormous. The increase of 30 per cent made in February, 1920, made the total increases about 230 per cent.

In September, 1919, freight and passenger rates in Belgium had been increased 40 to 60 per cent since pre-war times. Further increases have been made since then.

In September, 1919, freight and passenger rates in the Netherlands were advanced 50 per cent. Very much the largest advances reported in any country have been made in Germany, where, it is well known, practically all the railways are owned and operated by the government. Repeated advances were made during the war and still further very great advances have been made since the signing of the armistice. The passenger rates now average about 190 per cent higher than before the war, and the freight rates about 300 per cent higher.

Large advances in rates have also had to be made in many countries which were remote from the seat of hostilities. For example, in December, 1919, all freight and passenger rates on the South African Government railways were advanced 20 per cent, while in August, 1920, a rate of 70 per cent in both freight and passenger rates was made in Brazil, and in October of the same year additional increases were proposed. Even in Australia, which was about as remote from the effects of the war as any part of the world, all the government railways have suffered severely from the effects of the war and have had to make advances in their rates.

The railways of Great Britain were placed under government control at the beginning of the war and are still being operated. During the war the passenger rates were advanced 50 per cent, while the freight rates were not advanced at all, and because the increases in expenses greatly exceeded the increases in rates the government incurred a large deficit. To reduce or wipe out this deficit advances in the freight rates of the British railways ranging from 25 to 100 per cent were made in January 15, 1920, and extra charges were added to the rates which cover the collection and delivery of freight at stations as well as its transportation. In March, 1920, the demurrage charges imposed for loading a car one day beyond the period of free time were increased 100 per cent, and the charges for subsequent days 200 per cent.

For Sale

Poland China Boar, Fairview Jumbo No. 7812—15 months old; weight between 500 and 600 lbs. Price \$100.00. A good one. Apply J. Murdoch, Mornington. Phone 1414. Aug. 11-2p.

The Alameda High Pressure Lubricating system. Lubricates entire Chassis in ten minutes. Ask to see this demonstrated. It is one of the greatest labor savers out. Morrison and Johnston, Ltd.

Spring Valley S. D.

The interior of the school has been beautifully decorated, and renovated and is a credit to the community. Congratulations to the Trustees Board. The monthly meeting of the Women's Missionary Society will be held at the home of Mr. and Mrs. D. Foren on Wednesday, Aug. 18 at 3 p.m. It is earnestly hoped that a large number of Women will be present.

Backfalls W. I.

The regular meeting was held on Saturday August 7th at the home of Mrs. Wigmore, eighteen ladies being present. The business of the meeting was despatched in the usual prompt and business-like manner after which a discussion on "Pickles" proved very instructive. After the meeting adjourned, light refreshments were served by Mrs. Parker; Miss Lawton and Mrs. Chester Miller. The Ladies were afterwards entertained by some delightful singing by Mrs. Fred Miller; Mrs. Parkes; Miss Mathias; Mrs. Chambers and Mrs. Tooley; Mrs. Wigmore accompanying.

The ladies are having an ice cream social on Saturday evening, Aug. 14th on Mrs. Martin's Lawn when a good attendance will be appreciated.

Ice Cream Social

The Blackfolds W. I. are holding a Lawn Social at the home of Mrs. Martin on Saturday evening, Aug. 14th. It is hoped a good attendance will be recorded.

Edward Langrock Killed

Edward Herman Langrock was almost instantly killed, and Howard Dixon sustained a broken leg and other serious injuries, when the truck they were driving was struck by the Edmonton-Calgary express on Monday morning, on the Barnett Avenue crossing. The victims of the accident have been taken to A. M. Campbell's warehouse, south of the track for a load of binder twine, and with their load of a ton were on their way to the freight sheds. At the Barnett Avenue crossing, and coming from the direction of the warehouse, the view of the railroad track is obscured by the buildings of H. L. Brown and the water tank, and it is not until the crossing is reached that a train from the north can be seen. Apparently Dixon was driving the truck, did not hear the train whistle, and did not see the train until the engine was past the warehouse, and he just had time to yell at Langrock to jump when the crash occurred. Langrock was carried on the wreckage on the pilot of the locomotive until the station platform was reached, when an overhanging piece of the rock struck the platform and was forced down between the planks and the train. Dixon was more fortunate, the impact of the locomotive hurling him clear of the track to a distance of forty feet.

Medical aid was immediately summoned, and it was evident that Langrock was beyond human aid, and although he was still alive when taken from the wreck, expired a few minutes later. First aid was given Dixon, and he was removed to the Lacombe hospital, where at last reports he is progressing favorably.

Coroner Sharpe ordered an inquest to be held on Monday afternoon, and Detective Scott of Red Deer who had charge of the matter, called a jury and many witnesses of the accident. From evidence brought the fatality appeared to have been one of those unfortunate occurrences where no one is to blame, and a verdict was rendered accordingly.

A rider was attached to the jury's verdict to the effect that the C. P. R. should arrange some protection at the Barnett Avenue crossing, in Lacombe, and the matter will be taken up immediately with the Company by the Town Council. This crossing has been a menace to the public since the inception of the town, and many accidents have occurred there, although this is the first fatal one. Unless drivers use the utmost caution at this crossing, accidents are bound to happen. There is always in the morning heavy traffic at this point, four or five trains crossing within an hour, and the view of the tracks is obstructed by buildings.

Edward Herman Langrock, is the son of Mr. and Mrs. Henry Langrock, who are among our most highly respected citizens and has resided in Lacombe for a number of years, and had many friends here. He was born in Elmira, Wash., in 1891, being 29 years of age at the time of his death.

The sincere sympathy of our citizens is extended to the bereaved family and other relatives.

The funeral was held on Tuesday afternoon, service being conducted by Rev. Mr. Hollingsworth in the Methodist church, after which the remains were laid to rest in the Lacombe Cemetery.

Mr. and Mrs. Wm. Spillios of the Club Cafe left on Monday for California where they will live in future. Although having lived in Lacombe only a few months they made a host of friends, all of whom will be sorry to hear of their departure. Mrs. Spillios took a great interest in all things of importance to the town, and at the time of the Chataqua put forth every effort to help it along, and sold the greatest No. of tickets. Mrs. Spillios was commonly known as the "Big Lady" and counted among her friends every one she met. She asserts that she is very sorry to leave Lacombe, and will always look back with pleasure to her short stay here.

Baseball—Baseball

The game played Friday night was a good one, right through, and many good plays were made on both sides, but the Lacombe team had the edge on their opponents from the start. The umpire, Mr. Connelly from Rimbey, was fair and square all round, and although he came in for a lot of criticism from Innisfail, that's all right—we expected it—so there's no harm done. With the exception of a few arguments among the players the game went smoothly, and this win placed Lacombe higher in the league. We would like to see a larger crowd at the next game; there's lots of room, and the game will be a good one. The score at the end of the game was 7 to 3.

The game went as follows:

1st Innings: Veno fanned; Wagner knocked a 2 base; Louis put out on first; Lagou fanned.

2nd—Lacombe: Garland put out on strikes; Web caught out; Blades steals to third and as the third baseman misses ball thrown by catcher, Blades brings in Lacombe's first run. Green fanned.

3rd—Innisfail: Kortward caught out by centre field; Mark put out on strikes; Morgan fanned.

4th—Lacombe: Norris caught out by centre field; Vaughn fanned; Gunn put out on strikes.

5th—Innisfail: Delong gets a walk; Holliston was hit by ball and gets to first sending Delong to second; Garland misses ball, and Veno gets to second. Holliston makes third and Delong brings in a home run. Veno makes third; Louis fanned.

6th—Lacombe: Hill hit by ball gets to first; McPhee caught out. Garland gets a walk sending Hill to second; Blades knocks a one bagger sending Hill to third and Garland to second; Web gets a walk bringing Hill home; Garland to third and Blades to second; Catcher misses ball and Garland gets in; Blades gets to third; Green gets a walk; Norris is put out on first; Vaughn gets a walk; Blades comes home; Gunn knocked a one bagger and Web comes home.

7th—Innisfail: Kortward gets to second; Marks gets to first; Kortward gets home; Morgan fanned; Delong fanned.

8th—Lacombe: McPhee put out on strikes; Garland put out on first; Blades walked to first; Web knocked a two base hit bringing Blades in; Green put out on first.

9th—Innisfail: Holliston walked to first; Veno gets to first; Holliston put out on second; Veno steals to second base; Wagner fanned; Louis gets to first; Veno gets to third and then steals home. Lagou put out on third.

10th—Lacombe: Norris hit by ball gets to first; Vaughn put out on first; Gunn gets to last Norris put out on second; Hill put out on first.

11th—Innisfail: Marks fanned; Morgan gets to first; Delong fanned; Morgan put out on second.

12th—Lacombe: McPhee put out; Garland gets to first; and steals to second; Blades knocks a two bagger and brings Garland in; Web put out on first; Blades steals to third; Green gets to first and then steals second; Norris gets a walk; Vaughn knocks a three base and brings in Blades, Norris and Green; Vaughn steals home; Gunn is put out on first.

13—Innisfail: Delong gets a walk; Holliston put out on strikes; Veno fanned; Wagner fanned.

By Joe Jameson, Jr.

Wanted At Once

Two waitresses wanted at once \$45.00 a month with board and room. Apply in person to Club Cafe.

Notice

Notice is hereby given to all concerned, that ex-members of the Canadian Expeditionary Force, who are entitled to and who require post-discharge dental treatment, must submit their applications to the District Dental Officer at the Headquarters of the District in which they reside, on or before the 1st September, 1920. Applications for dental treatment received after 1st September, 1920, will not be considered.

Hay For Sale

The hay on the S.W. 1-4 of 4-40-28, for sale on ground. All fenced. Apply E. E. Scott, Lacombe.

Wanted—Wanted

Twenty or thirty acres of hay land. Will either buy cash or work on shares. Apply Globe Office.

Retray

From Gull Lake, one pure white Work Horse about 9 years old, weight 1300 lbs. Had halter on when last seen, harness marks visible. Finder notify E. C. Moore or R. King, Bentley. Jy 28 tfe

Want ¼ section of land between Lacombe and Gull Lake reasonable. State price, location, terms, number acres cleared, care of this office.

BRICK For Building

Goods Bought At Sale Not Returnable

Crop Average and Crop Yield

Addressing the Canadian Club of Regina during the week of the Provincial Exhibition, Dr. Tolmie, the Dominion minister of agriculture, laid emphasis upon the fact that, despite a steady and really large increase in acreage under cultivation in Canada during the last ten years, there had been a marked falling off in yield per acre, with the result that the farm production of the country had not grown in volume to the extent that might have been expected from the increase in acreage placed in crop.

Commenting on this disappointing result the Federal minister of agriculture said: "An increase of three bushels to the acre in the production of wheat in Canada would mean an annual increase of over \$118,000,000, and over \$500,000,000 could be added to the wealth of the country every year if the farmers would exercise more intelligence and enterprise in their agricultural operations."

These are startling figures even in this age when we have become accustomed to reckoning things in the millions of dollars. And Dr. Tolmie was speaking by the book; the official statistics of Dominion and provincial governments bear out the assertions he made.

It is assuredly in the interest, not only of the country as a whole, but in the interest of the individual farmer that the cause of this decline in yield per acre should be ascertained and steps taken to check its further progress and to bring about a steady increase in yield. There is far more money, and infinitely larger profits, in increasing the yield per acre than in largely increasing the number of acres in crop which produce a comparatively small yield.

Dr. Tolmie suggested certain remedies. First, a large increase in yield can be obtained from a more general use of good seed. Second, an intelligent rotation of crops will inevitably produce larger yields. Third, the introduction of more live stock on the farm will tend to the same much desired end.

There are other points which Dr. Tolmie did not dwell upon, but which must suggest themselves to any person journeying through the grain fields of the West and along our country roads. First and foremost there is the question of weeds. Western farmers spend huge sums of money annually in hail insurance premiums, but the annual loss from hail is but small in comparison with the annual loss resulting from the decreased yield because of weeds. Thousands of dollars are spent annually in fighting the gophers, and in Manitoba and Saskatchewan this year hundreds of thousands of dollars have been expended in the effort to overcome the grasshoppers. And it has all been money well spent. But year after year weeds take a greater toll than these pests without half the excitement or effort to eradicate them and stop the loss.

In many directions government and farmers' organizations are striving to improve the condition and advance the prosperity of the farmers, but thousands of farmers are themselves neglecting a matter the control of which is in their own hands. They are growing weeds instead of wheat, oats, barley and flax. Where there is an abundant crop of weeds there cannot be a heavy yield of grain.

Sooner or later the whole of Western Canada will have to bestir itself in connection with the weed problem, and the sooner the better for all concerned, and the cheaper in the long run. Public opinion on the question is badly asleep with the result that a weed official who proceeds to fearlessly do his duty quickly makes himself a most unpopular individual.

Another difficulty to be found is the weakness of so many men to acquire more land. More acreage seems to be their ambition rather than more grain. They seem to be happier with 500 acres yielding 14 bushels to the acre, or a like total crop of 7,000 bushels, although it is cheaper to plow, seed, harvest and thresh the 350 acre crop than it is the 500 acre one, not to speak of the capital tied up in the larger acreage which, in reality, is producing nothing. Men who are not tilting the land they have so long ought to be filled, are constantly mortgaging their future to buy more land and more equipment to work that land. Such men are not farmers, but land speculators. The West needs more of intensive cultivation, that is, better farming, rather than more acres brought under the plow.

Prince Edward's Work

He Does His Work Well Because He Is a Highly Trained Worker

On the prince's part, it is a remarkable achievement to have carried out his mission in such a way as to create this strong bond of sympathy between himself and the people of the Commonwealth. Beyond question he has done Imperial service of the utmost usefulness. But we venture to think he has greater assets than the charm of his personality. He does his work well because he is a highly trained worker. From his boyhood he has been prepared, and has prepared himself for one of the most difficult and responsible employments in existence.

We believe that, consciously or unconsciously, Australia and the other Dominions realize this fact and the stability that it gives to the Empire. Since they have seen the Prince in person they have been brought home more clearly to them than ever. They find that he is no amateur, but a skilful and diligent professional worker, and for that reason they give him not only the affection which his endearing personal qualities command, but their respect.

SUMMER COMPLAINTS KILL LITTLE ONES

At the first sign of illness during the hot weather, give the little ones Baby's Own Tablets or in a few hours he may be beyond aid. These tablets will prevent summer complaints and give occasionally to the well child, and will promptly relieve these troubles if they come on suddenly. Baby's Own Tablets should always be kept in every home where there are young children. There is no other medicine so good and the mother has the guarantee of a government analyst that they are absolutely safe. The tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

England's Aque Area Increased Since 1915 there has been a steady increase in the arable area of England due to the government policy of encouraging the production of foodstuffs.

A record hay crop is expected this year, but the outlook for the fruit crop is poor. Of apples and pears only 20 percent of the average is expected and the small fruit crops are also below average.

Three Thousand Still in Army Three thousand men who served at the front are still awaiting demobilization and it will be April before all are out of uniform. In Great Britain three hundred men are still engaged looking after stores or attending the operation of two military hospitals.

The war purchasing commission is gradually disposing of about \$600,000 of military stores.

Half Section at \$130 Acre A record price for land twenty-five miles from Regina in the Peace district is reported in the sale of a half section for \$33,000, or a little better than \$130 an acre.

The High Price of Sugar

makes one welcome foods which are rich in natural sweetness.

Grape-Nuts

—the ready-cooked cereal

requires no added sweetening, for it contains its own pure grain sugar, developed from wheat and barley by twenty hours' baking.

Sprinkle Grape-Nuts over ripe fruit or berries and you'll save sugar.

Make Life on The Farm Appealing

To Meet the Difficulty in Connection With the Exodus of Boys and Girls

Since the war a problem which has been worrying agriculturists all over the country, is that of keeping the boy and girl on the farm. All the literature that I have seen on the subject shows quite plainly that no panacea has been discovered in connection with the exodus of the boys and girls from the farms. I think that "home gentlemen" will all agree that we can at least go a long way towards solving the problem by adopting better farm methods; by making the home more attractive; by keeping better livestock; by making more profit on the farm, which will make possible more comfortable conditions such as will be conducive to happiness and contentment; by making conditions favorable for the farmer's wife and generally by doing everything we can to make life on the farm appealing. In addition to this I think that good roads and cheap automobiles should play a very great part in helping to keep the young people on the farms by rendering very valuable assistance to the farmer in different ways in connection with his work and by enabling him and his family to move around and mix with the neighbors, thus obtaining some social pleasure out of life.

NOTHING LIKE IT FOR BRONCHITIS OR WEAK THROAT

Remarkable Cures in the Worst Cases Reported Daily

Cures Without Using Drugs

Doctors now advocate an entirely new method for treating bronchitis and weak throat. Stomach dressing is no longer necessary.

The most approved treatment consists of a healing vapor resembling the pure air of the Adirondacks. This soothing vapor is full of germicidal and antiseptic qualities. At the same time it is a powerful healing agent. It is sent to the bronchial tubes and lungs through a skillfully devised inhaler that can be carried in the vest pocket. Simplicity itself is the keynote of this splendid treatment.

CATARHOZONE is the name of this wonderful invention that is daily curing chronic cases of weak throat, bronchitis and Catarrh. Every breath through the inhaler is laden with soothing, healing substances that destroy all diseased conditions in the breathing organs, it can't fail to cure what really exists, and doesn't attempt to cure an illness in the head or throat by means of medicine taken into the stomach. Catarhozone is a direct, breathable steam cure.

There is no sufferer from a grippiness or any winter ill that won't find a cure in Catarhozone, which is employed by physicians, ministers, law-ymen and politicians, through-out many foreign lands. Large size lasts two months and costs \$10.00 and is guaranteed; small size 50c, sample size 25c, all storekeepers and drug-gists, or the Catarhozone Co., Kingston, Canada.

The Peace River Country

Everything is Set For the Work of Expansion

The C. P. R. will operate the Dunvegan railway for the next five years. This is the essential fact in connection with the arrangements recently entered into between the McArthur Company and the provincial government on the one hand, and the C.P.R. on the other. Four hundred and fifty miles of railway line is directly involved. This is a length of line practically equal to that from Montreal, Que., to London, Ont., from Winnipeg to St. Paul, Minn., from St. Paul to Chicago, and 60 miles farther than from Edmonton to Coats on the United States boundary by way of Calgary and Lethbridge. There is room for vast development in such a stretch of country; development which must in large measure follow the railway service.

The coming five years mean everything to the Peace River country. Conditions have become established. Population is settled. Everything is set for the work of expansion. With railway service assured there is no doubt as to the progress of the district and its people.

While the actual mileage of the railway is sufficient to give the enterprise a position of first-class importance. At Peace River town the railway connects with 450 miles of navigable waterway on the Peace. Along the whole of this distance the river flows through a region of climate and soil suitable for farming settlement. Already people are pushing in, and occupying desirable locations, depending on the river for present communication and expecting that settlement and development will ultimately bring railway facilities.

The 450 mile stretch of unbroken river navigation is only part of a great system of waterways extending to the Arctic ocean through a region carrying possibilities of development of one kind or another—development that depends on railway communication and the push and enterprise that accompanies it—Edmonton Bulletin.

Montreal, May 29th, '09. Minard's Liniment Co., Limited.

Yarnold, N. S. Gentlemen: I beg to let you know that I have used MINARD'S LINIMENT for some time, and I find it the best I have ever used for the joints and muscles.

Yours very truly, THOMAS J. HOGAN, The Champion Club and Pedestal Dancer of Canada.

Cool and Heartless "Woman! you have ruined me with your extravagance. I am penniless. There is only one place for me now. Good-bye. I'm going."

"Where?" "To the river!" "Well, you'll be passing the post office. Do you mind posting this letter?"

Real Grief Earnest Reformer—"When I pictured the drunkard's death in a sordid attic, surrounded by empty bottles, my audience was moved to tears."

Filipant Miss—"I can quite believe it. It is touching to think of the emptiness of those bottles."—London Mail.

The sewing needle is one of the oldest implements used by man. Bone specimens have been found in the reindeer caves of France.

SUNDAY SCHOOL LESSON

LESSON FOR AUGUST 8

THE KINGLY KINDNESS OF DAVID

I. David's Righteous and Impartial Reign (8:15.)

When he was established as king over all Israel, he executed judgment and justice unto all his people. In this respect the sword as a type of the Lord Jesus Christ; for when David's greater son, the Lord Jesus, shall reign over all Israel, righteousness and justice will prevail in all the earth.

II. David's Inquiry for Some of Saul's House to Whom He Might Show Kindness (9:1-3.)

This story of faithful love to a dead friend is quite refreshing. David experienced great grief when he received the news that Jonathan had fallen in battle. Now when he is shown that Jonathan's son, Mephibosheth, is still alive, and that his efforts in the subjugation of his enemies, he acts himself to make inquiry as to whether there is any one left of Saul's family to whom he might show kindness for Jonathan's sake. When Mephibosheth, Jonathan's son, was found, David ordered him to be brought to him and restored to him his grandfather's estate. Being unable to cultivate it on account of infirmity, he arranged that it be cultivated for him. Not content with this, he ordered that Mephibosheth should eat of his own table as one of his sons. This example of David's nobility teaches us that those who are blessed and prospered should stop to enquire whether there are not some deserving ones whom they can help. It may be the children of some old friends who rendered us help in former days need care and help. Then, too, some faithful servant of God could be cheered along life's way. This should not be simply done as an act of charity, but in recognition of some lasting obligation in view of help rendered by their fathers in bygone days. This was the case with Jonathan. He had sacrificed much and endangered his life for David's sake.

The chief value of this lesson will be realized by making it a living story illustrating the plan of salvation. David's making enquiry for some one upon whom he can bestow kindness illustrates God taking the initiative in providing salvation for lost and needy souls. This is clearly suggested in David's expression, "show the kindness of God." Mephibosheth did not seek David's help or sympathy. Quite likely he had a fear and dread for him like the sinner has in many cases for the Lord. Salvation is initiated with the Lord. He did not make this provision because of man's merit, but out of a heart of grace, "or the sake of another, even Christ."

III. Mephibosheth is Found (vv. 4, 5.)

This lame man was found in the house of Machir in Lodebar. This strikingly illustrates the sinner's condition. The sinner is utterly unable to walk uprightly before the Lord. Mephibosheth was in the house of Machir, which means "sold." This is exactly the sinner's condition—sold into sin and under the power of "no pasture." This, too, suggests the sinner's condition of soul which nothing can satisfy but God. The sinner maimed and enslaved by sin has an "aching void" which only God and his grace can satisfy.

IV. Mephibosheth's Sense of Unworthiness (vv. 6-9.)

When he was brought into the presence of the king he reverently fell upon his face. Every sinner in the presence of God feels unworthy of His saving grace.

V. David Restores to Mephibosheth the Forfeited Estate of His Father (vv. 9-10.)

He not only restored his estate, provided a means of tillage. God not only receives us into his family as children and restores to us the estate forfeited by Adam, but provides for us the means of development.

VI. Mephibosheth at the King's Table (vv. 11-13.)

This act of kindness on the part of David was done out of the sincerity of his heart. This illustrates God's kindness to us in Christ.

A Severe Lesson

A loud voiced gentleman on one of the stands was boasting to a party of admiring youngsters about the doughty deeds he had done on the cricket field in days gone by.

Suddenly he turned his attention to the band and he observed, "those fellows play decently, but they have fallen off a lot since I was a member of the band!"

"What?" ejaculated one of the hearers with a curious expression. "You played with that lot?"

"Certainly," was the reply; "I was with 'em for years."

Then the crowd laughed, and the boastful gentleman hastily moved off on learning that the band in question was composed of inmates of the local lunatic asylum.

Pigeons carried 709 messages for the R.A.F. between April, 1918, and the armistice, often saving human lives and valuable airplanes.

Sooner or later a brave man bumps into a brand of terror that makes him look like a dollar minus seventy cents.

PARTRIDGE TIRES

Game as Their Name

There is Only One Difference Between These Houses--That is OWNERSHIP

These houses were built at the same time and cost the same. The contractor built one for Harry Duncan. Seeing the good value for renting prospects, the contractor built a second house and rented it to Tom Sinclair.

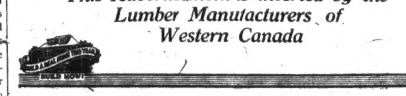

Harry Duncan owns his own home; he takes pride in it; keeps it looking fine. His monthly payments are less than Tom Sinclair's rent—which house would you prefer? Tom Sinclair has no interest in his house; he wouldn't improve it for someone else, and now after five years rent collecting the contractor is selling the house. Tom Sinclair must move, although he has paid enough in rent to buy the house.

There is the difference between renting and owning—there is the difference between spending and investing.

YOU CAN BE AN OWNER

See your nearest lumber dealer—see him now. Secure a copy of "Better Buildings" and know what beauty and convenience, combined with economy, will do for you through the lumber dealer's help. He has plans, specifications, working drawings and full particulars to give you—free. See him today. BUILD NOW.

Hens Must Work

The United Farmers of West Zorra, Oxford county, intend to send no more chickens from the class of hens known to the poultry world as "star boarders." A hen-culling campaign throughout the whole township will begin, and the otiose birds that refuse to do a decent stint of work will have to leave the pot or the oven, where they will serve a useful purpose. At any time it is a poor hen that will not pay for her own feed, and the present high cost of living for chickens has made it imperative that no mercy shall be shown the ones that will not give an adequate return for what they take in. It is a case of the survival of the fittest, directed by human intelligence instead of natural selection.—Toronto Globe.

Relief for Suffering Everywhere

He whose life is made miserable by the suffering that comes from indigestion and has not tried Parment's Vegetable Pills does not know how easily this formidable foe can be dealt with. These pills will relieve where others fail. They are the result of long and patient study and are confidently put forward as a sure corrector of disorders of the digestive organs, from which so many suffer.

A Good Record

Granting that we have had our off years we should remember that the average production of wheat per acre in Canada for the last ten years has been 19.25 bushels, while that of the United States has been only 14.72. And that, in spite of all the calamities which drought, hail, wind and frost have brought us.

Overdressed Youth

Here is a happy penny for you, my man, and pray tell me how you came to be so miserably poor."

Mendicant: "Ah, sir! I was you—too fond of giving large sums of money to the deserving poor!"

Do not suffer another day from PILES

Tariff Commission Will Hold Sitings In the West

Ottawa.—The tariff commission will open its sittings at Winnipeg on Wednesday, September 15. The commission will consist of Sir Henry Drayton, minister of finance, chairman, Hon. J. A. Carter, president of the privy council, Senator Gideon Robertson, minister of labor.

"It is necessary, Sir Henry informed a Canadian Press representative, that the commission's sittings should commence as soon as possible so that the labors of the commission be finished in time for consideration at the next session of parliament.

"It has been determined to open the meetings at Winnipeg on Wednesday, September 15. The commission, after the initial sittings in Winnipeg, will proceed direct to the coast and take evidence there, and hold sittings in the prairie provinces on the return journey in October, 20, as to meet the convenience of those whose farming operations would render their attendance in September difficult. On the return journey a second meeting will also be held in Winnipeg. The exact date of the sittings at other points will be stated in the near future.

The proposed itinerary of the commission is as follows: Winnipeg, September 15; Vancouver, Victoria, Vernon, Nelson, Calgary, Edmonton, Saskatoon, Regina, Brandon, Winnipeg, Port Arthur, Sault Ste. Marie, Windsor, London, Hamilton, Toronto, Kingston, Montreal, Sherbrooke, Three Rivers, Quebec, St. John, Moncton, Sydney, Charlottetown, Halifax, Ottawa.

Riots in Denver

Denver, Colo.—Nearly a score of people were injured, several of them seriously, and two cars were badly damaged as a result of an attempt of striking car men and their sympathizers to prevent operation of cars by strikebreakers. Shots were fired, wounding several persons.

The mob entered the Denver Post building and wrecked the presses and other equipment. It proceeded to break practically everything in the structure. After partially destroying three cars in front of the cathedral, the mob overturned the cars and planned to set them on fire. The crowd in front of the cathedral was estimated at 5,000. At 8.30, Commissioner of Safety Downer announced that Gov. Shoup had been asked to confer with the city officials on the subject of the immediate use of troops to quell the disturbances.

Men bearing guns from the wrecked cars paraded the streets.

Man Without a Country

Premier Hughes Will Prevent Return of Manix to Australia.

London.—Messages from Australia quote Premier Hughes as saying that Archbishop Manix would not be allowed to return to Australia. In an address at Melbourne, Australia, Premier Hughes severely attacked the archbishop, whom he declared, was responsible for much of the present sectarian bitterness now prevailing in that country. Mr. Hughes stated that Archbishop Manix does not represent Australia or the Irish nor any other question, and is the acknowledged Sinn Féin leader in Australia.

Mange Restriction Removed

200,000 Head of Cattle Available for Shipment from the Three Prairie Provinces.

Ottawa.—After being in force for the past twenty-five years or more, a blanket order covering mange among cattle in western Canada, was put out of commission by an order in council, passed at the instance of S. F. Toline, federal minister of agriculture.

It is stated that 200,000 head of cattle which have recently been dipped under the mange regulations will be available for shipment from the affected areas in Saskatchewan, Alberta, and parts of Manitoba. Local livestock experts declare that this will prove one of the greatest boons that has come to the Canadian livestock world in several decades.

Druggists Warned

Toronto.—Druggists have been warned by the Ontario college of pharmacy, that any druggist convicted of contravention of the Ontario Temperance act, will lose his certificate and be prevented from acting as a member, director or shareholder of any incorporated company dealing in drugs or medicines in Ontario.

Propose Stiff Penalties

\$2,000 Fine or Jail for Intemperance in Ontario.

Toronto.—It is believed that as an outcome of a conference held at the parliament buildings between Police Magistrate George T. Denison, of this city, and Attorney General W. E. Roney, that \$2,000 fines for breaches of the Ontario Temperance act, as well as imprisonment, may be fairly commensurate in the Toronto police court. So far, heavy fines are uncommon.

It is understood that Magistrate Denison was instructed on lines similar to the notices sent out by the attorney-general, to the magistrates throughout the province to the effect that venial, not revenue, was the object of prosecutions for breaches of the Ontario Temperance act, and suggesting imprisonment as a means to this end.

Damage from Hessian Fly

Ontario Counties Report Damage to Fall Wheat From Pest.

Toronto.—Serious damage has been done to fall wheat crop by the Hessian fly, in a number of counties in the southwestern section of this province, according to reports received by the Ontario department of agriculture. Reports from Norfolk state that some fields there suffered from 40 to 50 percent of damage from the insect. Barley has headed well, but the straw is short. Oats promise a generous yield with plenty of straw. Spring wheat has not done so well as the other grains mentioned, owing to continued catch weather, a good deal of it is still lying in the fields and as a result there will be considerable poorly-cured clover and timothy.

Paris.—The Bolsheviks are being held by the Poles at Brast-Litovsk, and have suffered a loss of 500 killed and drowned there on repeated attempts to throw their forces across the Bug River, according to Wednesday's communique from Warsaw, which officially confirms facts previously announced.

The communique announces that the Reds have forced the River Narw, before Lomza, and that Bolshevik cavalry patrols have reached Ostrow, 53 miles northeast of Warsaw. Near the Prussian border Bolshevik forces have recaptured Kolno, 18 miles northwest of Lomza, and have attacked the fortress of Ostroleka, 22 miles southwest of Lomza.

The Poles were reported to be making a stand at the latter place.

The communique reports fierce fighting along the Bug. The Reds have forced the stream in the region of Archychn and the Polish troops endeavoring to throw the Bolsheviks back across the River.

The Poles were reported to be making a stand at the latter place.

No Colonial Rule for Ireland

De Valera Declares That Republic is Already Established.

Washington.—Eamon De Valera, self-styled "president of the Irish Republic," has made public here a cablegram he has sent to Arthur Griffith, acting head of the "republic," characterizing as absurd reports that De Valera had written to associates in Ireland that he would accept colonial home rule.

"From cable despatches published here," his message said, "it is evident that an attempt is being made to fool the Irish people into the belief that I would accept colonial home rule. I have, of course, never at any time written any such letter. Any one in possession of a letter of mine, no matter how confidential, on any such topic, is free to publish it.

"Surely no one can think that new when the republic is established it would counsel a course which I refused to stand for when the republic was yet a hope. The whole thing is absurd."

Wheat Certificates

Winnipeg.—The first payment of a participation certificate issued by the Canada Wheat board has been made. Approximately 900,000 certificates have been issued, it is said, and the first participation is at the rate of 30 cents per bushel. A second payment of at least ten cents per bushel is expected. The first distribution will amount to \$30,000,000 or \$35,000,000, according to members of the wheat board.

NEWS OF THE PROVINCES

MANITOBA

Brandon.—Threshing operations in the Beresford district commenced on Tuesday, when W. J. McComb started threshing winter rye. Mr. McComb has about sixty acres of rye and expects it to yield about twenty bushels to the acre.

Winnipeg.—Prairie chickens are on the increase, and according to J. H. Evans, deputy minister of agriculture, an order-in-council allowing for a ten day season for this game may be passed. He emphasized the fact that the open season for ducks is Sept. 15, not Sept. 1, as many believe.

Saskatchewan

Regina.—The G.W.V.A. in Saskatchewan is about to make a monster drive for membership throughout the province.

Regina.—According to the Regina Leader, there is very little prospect of any immediate steps being taken by the Saskatchewan Co-Operative Elevator company towards the formation of a pool for the marketing of the 1920 wheat crop.

Regina.—The Dominion government has approved of Saskatchewan's \$1,800,000 road building programme, according to an announcement of Hon. S. J. Latta, minister of highways. With the provincial government \$2,700,000 roadway plans the province will spend \$4,500,000 on good roads.

Alberta

Lethbridge.—To Skiff district, a new settlement along the Lethbridge-Weyburn line of the C.P.R., belongs the record for early shipment of 1920 grain. A carload of rye was shipped from that town Wednesday. The town is the centre of a big new producing area, which will have a high average crop this year.

Edmonton.—A special train of 200 Alberta farmers is on its way to Alberta to look over prospective purchases in the Peace River country.

Calgary.—The consensus of the latest detailed reports received indicate there is every prospect of a good harvest in almost every part of the province. General rains accompanied by warm weather have produced ideal growing conditions.

British Columbia

Vancouver.—The price of coal to householders here has been advanced from \$14.50 to \$15 a ton.

Westminster.—Indications are that the total cherry crop will be about the same as last year's. Apples will exceed last year's output by 10 percent, and there will be a slight increase in peaches. Plums are variable and the total crop will run about 80 percent of last season's.

Vancouver.—Nearly 400,000 worth of farm lands in the northern central part of the province have been sold by one private company during the past three months. They were all purchased by British or Eastern Canadian farmers.

Where Germany Stands

London.—The Bavarian traffic council has decided to issue a proclamation to the postal and telegraph employees, calling on them to prevent the conveyance of canteen troops or arms and munitions by all means, paralyzing, if necessary, the whole of the Bavarian transport system, says a wireless from Berlin.

W. N. U. 1328

British Fleet Ready

Can Impose Blockade Against Russia on Short Notice

Montreal.—A London cable to the Montreal Star carries the following statement from the British Admiralty respecting an airtight blockade of Russia should that action be necessary.

"We will be able to impose an airtight blockade upon Russia within 12 hours after the orders are received. The British fleet around Constantinople is in a position to seal the Black Sea, while three cruisers and a school of destroyers in the Baltic are ready to draw a cordon there. There is nothing to fear from the Red fleet, which is small and ineffective."

France and Britain were believed prepared to join in sending munitions to Poland.

Send Greetings to Britain

United States Sends Message on the Sixth Anniversary of Entry into War

New York.—Greetings on the sixth anniversary of Great Britain's entry into the war were cabled to Field Marshal Earl Haig and Admiral Sir Beatty by Franklin D. Oiler, national commander of the American legion.

"Honour to the statesmen who had the courage to assume responsibility of that decision," reads the message. "Honour to the British Millions who with valor unsurpassed and hearts of oak, executed the decision on Britain's most fronts. When we contemplate what would have been the state of affairs in the world today had not Britain acted as she did, the trials and difficulties of the present hour, however vexatious they may seem now, be, sink into comparative insignificance."

"United States forces have had the privilege of service on land and sea under British high command. The memories of the associations of these great days will never perish. They will perpetuate themselves in our hearts and thus serve to perpetuate the indissoluble friendship of the British and American peoples."

Mesopotamia Situation Serious

British Column Suffers Defeat According to London Daily News

Montreal.—A London cable to the Montreal Star says: "The Daily News learns that the British situation in Mesopotamia is serious. The three hundred casualties which the war office reported are nearly all killed. The defeated column was a battalion of the Manchester, with miners, sappers and a six-gun battery. Only a few stragglers returned. Four guns were saved. A fresh division has been ordered to Mesopotamia from India. Enquiries to the Ashton-under-Lyne depot of the Manchesters showed that the second battalion was commanded by Colonel Wright, who was in Mesopotamia in March."

The Kufah garrison, on the Lower Euphrates, is still holding out, although the town has been partly burned down.

Canadian Nurses for Rumania

Montreal.—Plans are afoot to send a delegation of Canadian nurses to Rumania to do special work in connection with reconstruction in that country, although no definite arrangements have yet been completed. The members of the Canadian party will not do actual nursing, but will form the nucleus of a training school where Rumanian girls and women can learn the rudiments of the profession of caring for the sick, very little of which is at present known in that country.

Freight Increase in U. S.

Washington.—The American travelling and shipping public may expect to begin paying the increased passenger fares and freight rates authorized by the interstate commission August 26, the railroads have announced.

Fleet Sent to Baltic

London.—The Herald, the Laborite organ, says that the British north sea squadron has been ordered to the Baltic sea and that instructions have been issued to reimpose the blockade against Russia.

Battleships Surrendered to Britain

Edinburgh, Scotland.—Two of Germany's most formidable battleships, the Heligoland and Westfalen, and 12 destroyers, allocated to Germany, have surrendered at Rosyth where they arrived from Kiel.

Japan Puts Larger Forces in Korea

London.—The Japanese have increased their garrison forces in Korea by 4,800 men, owing to the unsettled conditions, it was announced here.

Joseph Devlin Is Ejected From British House

Premier Speaks ON IMPORTANCE OF THE PRESS

Ottawa.—Speaking before a gathering which included his excellency the governor-general, members of the government and of parliament, delegates to the imperial press conference from the four corners of the empire, and others prominent in the life of the Dominion Premier Arthur Meighen enunciated the principal, which, in his opinion, should govern the writers and distributors of news.

"The distribution of news is now the greatest trust in the whole body of democratic," he declared. "The opportunities for good are infinite, the possibilities of mischief are just as vast. In my way of looking at it, there is only one motto to editors, namely to be true to the public and to the truth."

"The distribution of news is now the greatest trust in the whole body of democratic," he declared. "The opportunities for good are infinite, the possibilities of mischief are just as vast. In my way of looking at it, there is only one motto to editors, namely to be true to the public and to the truth."

London.—By an overwhelming majority the government jammed through the Irish Crimes Bill, designed to restore order in Ireland. Lengthy debates preceded the voting in the house of commons but lacking the presence of Premier Lloyd George and Herbert Asquith they did not stir the interest which attached to yesterday's discussion, and were far less acrimonious.

A notable exception was a furious outburst by Joseph Devlin, Nationalist member from Belfast, who defied the authority of the house to bring him to order, and precipitated an exciting scene, as a result of which he was suspended. He stalked out, followed by all the other Irish members, and almost the entire labor representation.

For a time it seemed as though there was no way for suppressing Mr. Devlin except removing him bodily. He unloosed a flood of invectives against the bill, demanded that Lloyd George be summoned to "share responsibility for this inequitable measure," and vehemently asserted that in the premier's absence was that he might "concoct another war with Russia."

From the government benches, cries of "Order, order," arose with admonitions to respect the house. Mr. Devlin shouted in reply, "I have no respect for the house; I despise it."

Bedlam then broke out. When the chairman finally managed to make himself heard he severely admonished Mr. Devlin, threatening to expel him from the chamber if he continued to ignore the authority of the chair. Devlin, who had now worked himself up to a high pitch, continued defiant whereupon the chairman called on the sergeant-at-arms to remove him. He refused to budge and the chairman found it necessary to summon the speaker, who was absent, as the house was sitting in committee.

The sergeant-at-arms placed a huge formidable looking mace on the chairman's table. The galleries anticipated rough and tumble developments.

"Bring on the army of occupation," shouted Mr. Devlin, but he calmed down when the speaker, impressive in wig and gown, entered the chamber and, with dignity, seated himself on the dais. He was accompanied by Mr. Devlin's conduct and put motion to the house to suspend him.

Devlin appeared to take the sentence philosophically, and when the vote on the motion to suspend him was announced, he walked out rapidly before the speaker could conclude the request that he leave. The ensuing exodus of Irish members and labor champions left only a handful of Liberals to continue the fight on the bill, and there was no further excitement until application of closure met with angry shouts of "kagged."

M. D. Crown 399

The council of the above district met in the Municipal office, Winslow Block, Lacombe, alldomestics being present.

The minutes of the previous meeting were read and it was moved by Roberts that they be amended re district highways.

Crooker—That the minutes of last meeting be approved.

Maddox—That a grant of one hundred and three dollars be made to Blackfalds cemetery.

Morrison—That petition re road to Joffre be tabled for further information.

Crooker—That Mr. Schaffer be paid ten dollars as per agreement, road through N.E. 36-40-27-w4.

Maddox—That Sam Morris be appointed constable for the Municipality.

Morrison—That a committee consisting of the Reeve and Councillors Maddox, Crooker, be appointed to inspect divisions on E 1/2 of 26-41-28-w4 and East of Sec 17-41-27-w4, with power to act as seen fit.

Maddox—That secretary be instructed to write C. B. Sherman for contract to dig a ditch, 2 ft. deep on N.W. 1/4-1-39-26-4.

Roberts—That R. J. Murray be notified that as soon as road is made possible to crossing the council will put in an application to C. N. R.

Roberts—That the secretary be instructed to notify the survey Dept. at Edmonton that their services will not be required in this district this year.

Roberts—That a grant of five hundred dollars be made to the Lacombe Agricultural Society.

Maddox—That Crooker be appointed representative on Board of Directors of Agricultural society.

Roberts—That nominations for directors close.

Gibson—That the payment of grant to the Lacombe Agricultural society be made at first meeting in Dec.

Roberts—That Maddox be made deputy Reeve for the ensuing six months.

Crooker—That he secretary be instructed to write the public Works Department requesting assistance in the following form, work to be done by government.

Bt. secs 9 and 16-41-27-w4. Grant \$200.

Bt. secs. Sand 9-41-27-w4. Grant \$150.

1 1/2 ft. pile bridge, East of 26-41-27-w4.

1 1/2 ft. pile bridge, Bt. 21 and 22-40-26-4.

Crooker—That secretary be instructed to notify the C.N.R. that a 3 p.c. grade should be put in at mile 51 on Brazeau crossing, also a 3 p.c. grade on Burbank crossing and crossing re-planked.

Hedemark—That the secretary be instructed to request the government to abandon the road once laid out on blind line south of Sec 33-39-26-w4, there being no further use for it and the two bridges on it are decayed and are dangerous for stock, etc., said line was never used for road purposes.

Roberts—That Jesse Fraser be auditor for the year 1920 at a salary of \$200.00 per annum.

Morrison—That each councillor be a committee of one to take charge of the gopher question, and to take such steps as may be necessary to look into all complaints within their divisions and take any action required.

Morrison—That the Reeve and secretary be instructed to pay the Avery Co., the sum of \$5,570.00.

Maddox—That the Reeve and secretary be empowered to borrow the sum of six thousand dollars (\$6000.00).

Roberts—That the request of the public works department re Engine grading outfit on the road from Ed-

monton trail to Sylvan Lake be granted.

Maddox—That the following labour pay sheets be ordered passed, the Reeve authorized to sign and treasurer instructed to pay same.

B2—\$20.80; B2—\$41.65; G. F. 176-46; C2—\$61.25; B3—\$25.20; A. D. 176-60; D1—\$60.90; F3—\$235.25; G. Engine \$75.30; Total \$1642.40.

Crooker—That the following accounts be passed and ordered paid.

Dr. Sharpe, \$60.00; J. McNab, \$42.95; H. Hunt (gas) \$34.00; F. Taylor \$8.50; Morrison and Johnston \$212.28; H. Hunt (salary); \$180.00; L. F. Krouse, \$3.90; H. E. Brown \$9.00; Herb Dool, \$34.75; Atlas Lumber Co. \$85.45; J. Hackerman, \$25.00; Lacombe Furniture store, \$68.50; Imperial Oil Co. \$279.74; A. M. Campbell, \$3.85; Morrison and Johnston, Ltd., \$61.95; E. D. Scott, \$12.70; Imperial Oil Co. (Blackfalds), \$38.33. Total \$1212.02.

Maddox—That an appropriation of \$1000.00 be granted each division for expenditure.

Gibson—That Secretary-Treasurer be paid seven hundred dollars, being last quarter payment on salary (1920).

Gibson—That the meeting be adjourned to Sat. August 7, 1920.

E. Walter Simpson, Sec.-Treas. M. D. Crown No. 399.

Politics—On a High Level

We are told that the welcome given to Premier Meighen in his home town of Portage La Prairie was non-political and that his speech was in keeping. This is quite correct in the ordinary sense in which the word "political" is used. There was not the slightest suspicion of appeal to partisan spirit. But he did give expressions to political opinions of a very definite character and in a manner to impress them greatly on the public. Because of the absence of narrow partisanship in connection with the gathering, what he said should be all the more effective.

His response to the speech of the new prime minister of Quebec, in which the latter declared that the time had come when isolation of that province should cease, was of a character which should help in bringing about that spirit of co-operation, instead of one of estrangement, which Mr. Taschereau desired.

I re-echo that appeal said Mr. Meighen. I believe it to be my duty to answer that appeal to the utmost of my power. I hope it receives a warm and cordial response in every end of this country. Neither side feels, nor will admit responsibility. If we wait until either side admits responsibility for what estrangement has existed we will never get anywhere. Let the question of responsibility go by and let us look to the future.

Those who take a narrower view will insist in traversing the past and abusing one another on the strength of it. This can get us nowhere and must have the effect of impairing greatly our national efficiency. There is every reason to believe that the men in control of the governments at Ottawa and at Quebec have not only the desire but the political strength to put an end to the senseless recriminations and to consider only the permanent well being of the country at large, which must be adversely affected if division between Quebec and the rest of the dominion continues.

It was only one phase of a much wider problem to which Mr. Taschereau had directed attention. Mr. Meighen went on to discuss it in its broadest aspects.

"The peril of every nation," he declared, "has been a tendency to divide on lines of race, on lines of religion, on lines of social caste, on lines of occupation. When the tendency gets too strong the beginning of the end has come. If we do not come together and reach a better understanding and a better unity on things that are vital and essential to the state, there will be a heavy penalty paid."

Justice all round should stand at the basis of the country's policy, he informed his audience, though they had to recognize that what one person thinks is right another person thinks is wrong. The only thing to do was to be alert at all times to examine every grievance with a real foundation and to treat it in a liberal and generous spirit.

But the premier went on, experience has taught us that the removal of injustice is not itself enough. The idealist may talk as he likes, the theorist may prate as he pleases, but you cannot get rid of the enemies for order by mere force of equitable laws. Make your laws as fair and just as human wisdom can devise, enforce them as impartially as you will and the state may still be in danger. The demagogues and the destructionists can keep within the law and still do their work. By misrepresentation, by the arts of language, by the guile of words, they poison and inflame the mind. In nearly every case they first convince themselves. Then they go on, with increasing enthusiasm, to set whole populations on edge. The tension of the last few years has been their opportunity.

Against this foe there must be set the united moral force of right thinking people. I firmly believe that the right thinking people who want law and order, those who see the securing of property, honestly earned, those who want policies, of sanity and moderation. I believe the conditions of the country, and still more, the conditions of the world demand that they stand together.

There can be no compromise with what is fundamentally wrong. We cannot tolerate what is merely selfish and destructive. The common sense of the country must take warning in time and stand irrevocably against it. The fortification of law and order must remain impregnable.

This is getting down to the fundamentals and all sane and moderate minded citizens should be able to agree that no matter what the prime minister's performance he enters upon his duties with the right ideas of his policy.

One of the great troubles of the past has been that our partisan zeal has led us frequently so very far astray from the things that really matter. We make a great mistake if we allow our political sympathies or antipathies or our theorizing to endanger our most vital interests. Now, as at all times—but particularly now—we have need to keep a firm mental grasp on the realities of politics and the new premier has done well to call attention to these so forcibly in his first public utterance of importance since assuming the duties of office.

A Plea For The Teacher

The future of Canada hangs in the balance very much as in the case of Canadian school-boys. In the wide-spread discussion of better methods of promotion the more perfect understandings of Canadian ideals by all the people, we recur constantly to the school-teacher. Here is a public servant whose work is essentially constructive.

Pay the teacher a wage commensurate with their great responsibility to the nation!—Cosmopolitan.

For Sale

Several good Registered Shorthorn Cows and Heifers. Some springing and with calf at side. Also two good Clyde Geldings, 4 years and 6 years old; weight about 3,000 lbs. Apply to E. W. Sladen, Phone 1110. A4-2p.

Meyer—Archibald

The home of Mr. and Mrs. A. W. Archibald at Lochinvar was the scene of a quiet but pretty wedding on July twenty-eighth, when their eldest daughter, Anna Maude, was married to Mr. Christian Meyer of Halkirk, Alberta; Rev. Mr. Turner of Ponoka officiating.

The ceremony took place in a pavilion, prettily decorated for the occasion. The bride entering on the arm of her father, was becomingly gowned in white, wearing a veil and orange blossoms worn by her mother, a pendant set with sapphires, and carried a bouquet of carnations and sweet peas. She was preceded by two little flower girls, her niece, Margaret Archibald, and Phyllis Gray of Calgary, dressed in white and pink. She was attended by her sister, Lillian who looked charming in blue and was wearing a string of pearls, the gift of the groom.

The groom was supported by his brother Peter also of Halkirk.

After the ceremony, the guests sat down to a daintily prepared luncheon. The bride and groom left on the evening train for Jasper Park, where they will spend two weeks camping.

The bride was the recipient of some very handsome gifts and congratulations from many parts of Alberta.

Famous Explorer Is Lost in Fields of Eternal Snow

AT THE REE

In that land of eternal ice and snow, that dread expanse of the South Polar regions, it is believed that Martin Conrad and his companions, seeking the earth's axis, have been lost, nipped in the ice floes and left to die a slow death from starvation and exposure.

The foregoing sounds like an actual record, but it is only a part of the plot of "The Woman Thou Gavest Me," Hall Cain's masterpiece now presented for the first time on the screen, via Paramount-Artcraft directed by Hugh Ford and adapted by Benia Marie Dix.

The records of other lost exploring parties at the two extremes of the earth have frequently filled the world with sadness, but in the cause of science many men have willingly sacrificed their comforts and lives to the end that the world's stock of knowledge might be enlarged.

The South Polar feature is merely one incident of the picture which will be shown at the Rex Theatre on Friday and Saturday, the 13th and 14th and which tells the story of Mary McNeil, placed in the most terrible position a woman could occupy, and of her struggles against Fate and the so-called natural laws.

The production is declared to be one of the most gripping made and the cast is practically all star. Katharine MacDonald one of the best and most favorably known screen favorites has the leading role, Milton Sills, Jack Holt and Theodore Roberts have important parts. The support generally is of the best.

Wanted

Young man wanted to assist in stock and stacking. Apply to G. P. Burns, Blackfalds, Alta. Aull-1

Strayed

On July 20th, a red steer with a little white, nearly one year old. Supposed to have gone east of town. Finder notify W. D. Reid, Phone 1415.

Rimby News

Eckhart's store has been removed from the site to its new location near the depot and is now open for business.

Joe Lamb intends erecting a livery and feed barn near the depot in the near future.

Beatty, our enterprising hardware merchant, has a splendid stock of everything in hardware and building necessities on hand, and his up-to-date stock is greatly appreciated by our residents.

The railway is being pushed ahead, and will soon cross the river. It is getting into a great farming country, and there will be a good opening for an enterprising businessman this fall.

The crops around here are good, and we will have our usual big yield. A little hail has visited parts of the district, but the loss is not very great.

Connelly's garage is now doing business, and a first class mechanic is on hand to fix up your cars on short notice.

Business in general is quiet just now, many of the farmers being busy haying.
